Tucson Electric Power Relighting Program

Commercial Energy Solutions from Tucson Electric Power

Large Business Prescriptive Retrofit Rebates

Prescriptive Rebates are available for energy efficiency improvements to existing facilities including lighting equipment.

The prescriptive lighting and controls component measures are listed below:

- Replacing T12 lamps and magnetic ballasts with T8 or T5 lamps with electronic ballasts
- Replacing T12 lamps and magnetic ballasts with premium efficiency T8 lamps and electronic ballasts
- Delamping must include a fixture modification that results in permanent removal of lamps and/or ballasts ¹ (note that a pre-notification application and pre-inspections are required for delamping projects)
- Installing new T5 high output lamps and electronic ballasts
- Retrofitting exit signs with high efficiency exit signs
- Installing hardwired passive infrared or ultrasonic detector occupancy sensors
- Installing continuous or stepped daylighting controls
- Replacing incandescent or high intensity discharge lamps with compact fluorescent lamps (CFLs) or installing hard wired CFL fixtures

For all lighting measures, replaced PCB ballasts and lamps must be disposed of properly. Disposal documentation may be requested by Program staff.

1 For projects where a T12 to T8/T5 conversion occurs in conjunction with delamping, the new T8/T5 lamps will receive the T12 to T8/T5 Rebate level per new lamp installed and the number of lamps de-lamped will receive the delamping Rebate on a per lamp de-lamped basis. The equipment for the T12 T8/T5 retrofit Rebates must be in place for a minimum of 5 years. If there are any additional modifications, such as delamping done in the future, a prorated portion of the T8/T5 Rebate must be returned to TEP.

Classes Offered at Barker Morrissey Contracting, Inc.

Do you have management or field personnel that you feel would benefit from these classes to reduce your insurance costs, liability risk, accidents, or service calls?

1. **Two (2) Day OSHA Ten Hour Class:** Earn your OSHA Ten Hour Attendance Card. Outline of class: OSHA at work, inspections, process, compliance, MSDS, fall protection, electrical, trenching, and much more.
2. **Roof Penetration Seminar (2-3 hours)** – This seminar is taught by Robert Barreras, Owner of Eagle Roofing, LLC. Robert can give you a look into a roofer's perspective on how to avoid leaks and be prepared for the monsoon season.

If so, please sign up for one or both of these classes by filling out the form below.
